

COSMAN

G4

Four Output Graphics Radiofrequency Generator

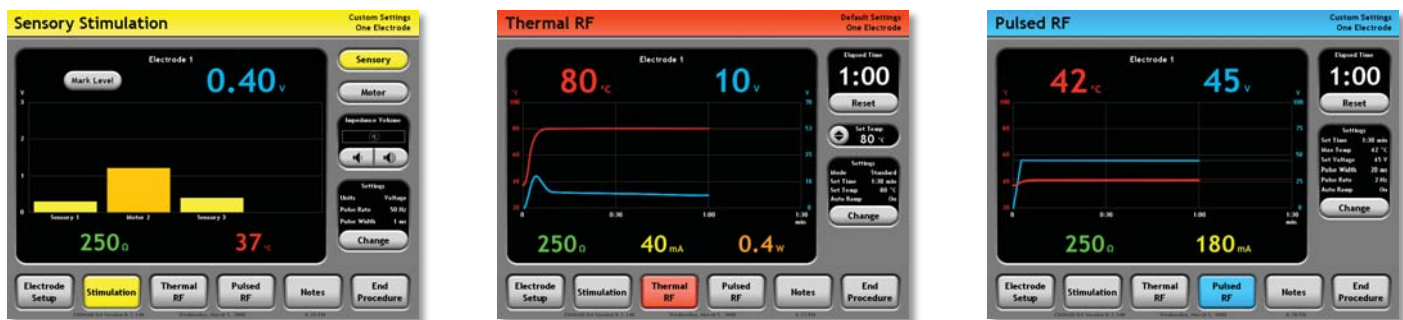

Automatic Control • Four Outputs • Touch Screen Interface

Personal Settings Presets • Data Export & Printing

Cosman G4 — A fully automated RF Generator with four RF outputs

- Thermal and Pulsed RF treatment on 1, 2, 3, or 4 electrodes
- Bipolar RF on 1 or 2 pairs of electrodes
- Independent electrode control with automatic stagger start feature
- Intuitive touch screen interface. Use of control knob is **not** required.
- Personal settings presets for multiple physicians and procedures
- Electronic procedure records and screenshot
- 12" display with large-format numerals, visible from a distance
- Minimal training required, with intuitive screen displays and prompts

Cosman Medical — 56 years of leadership in RF medicine

Cosman Medical represents 56 years of experience, innovation, and leadership in the field of Radiofrequency medicine. We offer the widest range of generators and electrodes for use in RF Pain Management and Neurosurgery. Cosman RF generators incorporate modern electronics that are both reliable and cost-efficient, and their creative design translates to robustness and ease of use. Cosman Medical's ongoing commitment to the field is reflected in a policy of superior customer service and initiatives in academic medical research.
